Aug 2023 – May 2027

CGPA: 8.71 / 10

**Coursework:** Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, Software Engineering, Cryptography

## Experience

### Research Intern — Cybersecurity & Software Assurance

May 2026 – Jul 2026

SAG, DRDO – Ministry of Defence, Delhi

- Conducted unit, integration, and static analysis (SAST) tests on classified defence-grade software; documented defects and remediation steps within a Secure SDLC workflow.
- Performed code review and software quality validation; applied secure coding practices across classified development environments.

### Software Engineering Intern

Jun 2025 – Jul 2025

Kirat Communication Pvt. Ltd., Haryana

- Built a REST API backend in Flask for a multi-stage voice-AI pipeline (Whisper STT, Ollama LLM, Gemini API) on Raspberry Pi; reduced latency by 40% through audio buffer optimization and request batching.
- Delivered a working MVP independently in 6 weeks — owned backend architecture, API design, implementation, testing, and deployment for an early-stage startup.

### Chairperson — Backend & Systems

Apr 2025 – May 2026

Nexus Club, VIT Chennai (200+ members)

- Built and shipped the club website and internal automation tooling (TypeScript, Next.js, Supabase); owned full development lifecycle from design to deployment.
- Led Git/GitHub workshops for 200+ students; organized NexusForum with 1,800+ attendees, managing technical infrastructure end-to-end.

## Projects

### Developer Portfolio — Full-Stack CMS

Next.js, TypeScript, Supabase (PostgreSQL), Tailwind CSS, Vercel — [adityak.dev](https://adityak.dev)

- Built a full-stack CMS as sole developer: Next.js SSR frontend, Supabase PostgreSQL backend with row-level security, auth-protected admin dashboard for content management across 4 modules.
- Designed normalized database schema with role-based access control and real-time sync; deployed on Vercel.

### CloudClip — Serverless Cross-Device Clipboard

AWS Lambda, API Gateway, Amplify, S3, JavaScript

- Built a serverless clipboard sync backend on AWS (Lambda + API Gateway + S3); achieved sub-100ms API response measured via Postman; stateless auto-scaling with zero server provisioning.

### RetailLens — E-Commerce Analytics Pipeline

Python, pandas, SQL, Streamlit, scikit-learn, matplotlib, seaborn

- Built an ETL pipeline on a 500K+ row dataset — pandas cleaning, SQL aggregation, RFM segmentation, and cohort retention analysis surfacing a 34% repeat-buyer rate across 37 categories.
- Deployed a Streamlit dashboard with time-series visualization and a logistic regression churn model at 81% accuracy.
