Education

B.Tech Computer Science — Vellore Institute of Technology, Chennai

Aug 2023 – May 2027

CGPA: 8.71 / 10 **Coursework:** Operating Systems, Computer Networks, Distributed Systems, Cloud Computing, DBMS, Software Engineering

Experience

Research Intern — Cybersecurity & Software Assurance

May 2026 – Jul 2026

SAG, DRDO – Ministry of Defence, Delhi

- Performed SAST, secure code review, and software assurance on defence-grade software under classified development workflows and strict confidentiality protocols.
- Applied Secure SDLC practices to identify and document vulnerabilities; validated code quality and security compliance across classified codebases.

Software Engineering Intern

Jun 2025 – Jul 2025

Kirat Communication Pvt. Ltd., Haryana

- Built a RESTful API backend in Flask for a multi-stage inference pipeline (Whisper STT, Ollama LLM, Gemini API) on Raspberry Pi; reduced end-to-end latency by 40% through audio buffer optimization and request batching.
- Designed REST endpoints and backend architecture independently; delivered a working MVP in 6 weeks for an early-stage startup.

Chairperson — Backend & Systems

Apr 2025 – May 2026

Nexus Club, VIT Chennai (200+ members)

- Built the club website backend and internal automation tooling (TypeScript, Node.js, Supabase/PostgreSQL); managed technical infrastructure for the organization.
- Coordinated NexusForum — 1,800+ attendees, industry speakers, and competitive programming tracks.

Projects

CloudClip — Serverless Cross-Device Clipboard

AWS Lambda, API Gateway, Amplify, S3, JavaScript

- Built a serverless clipboard sync backend on AWS (Lambda + API Gateway + S3); achieved sub-100ms API response measured via Postman; stateless auto-scaling with zero server provisioning.

Developer Portfolio — Full-Stack CMS

Next.js, TypeScript, Supabase (PostgreSQL), Tailwind CSS, Vercel — adityak.dev

- Built a full-stack CMS: Next.js SSR frontend, Supabase PostgreSQL backend with row-level security and role-based access control across 4 content modules, auth-protected admin dashboard for content management.

Ubuntu Server — Browser-Based VDI System

Linux, QEMU/KVM, NGINX, VNC, noVNC, Tailscale, Netplan, Bash

- Provisioned headless VM via QEMU/KVM; configured NGINX reverse proxy and noVNC for browser-based remote access; implemented two-layer auth and Tailscale overlay networking for secure WAN extension.

Technical Skills

Backend & APIs: FastAPI, Flask, Node.js, RESTful API Design, PostgreSQL, Supabase, Firebase, Containerization (Docker)

Cloud & Infrastructure: AWS (Lambda, API Gateway, Amplify, S3), Docker, Docker Compose, NGINX, CI/CD (GitHub Actions), Linux, SSH, Bash

Languages: Python, TypeScript, JavaScript, Java, C, C++, SQL, Bash | OOP, Data Structures & Algorithms

Security: SAST, Secure SDLC, Secure Code Review, OWASP Top 10, Static Analysis

Frontend: React, Next.js, Tailwind CSS, SSR **Tools:** Git, GitHub, Postman, VS Code

Certifications & Achievements

- Oracle Cloud Infrastructure Architect Associate** (2026) · **OCI Foundations Associate** (2026)
- LeetCode — 250+ problems solved across arrays, trees, graphs, and dynamic programming.
- Defy '25 Aptos Side Track Winner** — blockchain smart-contract solution at national hackathon.
- Open Source — 40+ public repositories; Pull Shark & Pair Extraordinaire GitHub achievements.
- Competitive Programming — problem setter, mentor, and judge across 5+ contests, CodeChef VIT-Chennai Chapter.
