Education

B.Tech Computer Science — Vellore Institute of Technology, Chennai

Aug 2023 – May 2027

CGPA: 8.71 / 10

Coursework: Cloud Computing, Operating Systems, Computer Networks, Distributed Systems, Cryptography, Software Engineering

Certifications

- **Oracle Cloud Infrastructure Architect Associate** (2026) — cloud architecture, networking, compute, storage, security on OCI.
- **Oracle Cloud Infrastructure Foundations Associate** (2026) — core cloud concepts, IaaS, PaaS, SaaS, OCI services.

Experience

Research Intern — Cybersecurity & Software Assurance

May 2026 – Jul 2026

SAG, DRDO – Ministry of Defence, Delhi

- Performed SAST, secure code review, and Secure SDLC compliance validation on defence-grade systems within classified infrastructure.
- Applied secure deployment practices and compliance checks under strict confidentiality protocols across classified environments.

Software Engineering Intern

Jun 2025 – Jul 2025

Kirat Communication Pvt. Ltd., Haryana

- Built a multi-service inference pipeline (Flask + Whisper STT + Ollama LLM + Gemini API) deployed on Raspberry Pi; reduced latency by 40% through audio buffer tuning and request batching.
- Delivered the system independently in 6 weeks — handled architecture, implementation, and deployment for an early-stage startup.

Chairperson — Backend & Systems

Apr 2025 – May 2026

Nexus Club, VIT Chennai (200+ members)

- Built the club website on Vercel with Supabase cloud backend and internal automation tooling (TypeScript, Node.js); managed technical infrastructure.
- Coordinated NexusForum — 1,800+ attendees, industry speakers, and competitive programming tracks; led Git/GitHub workshops for 200+ students.

Projects

CloudClip — Serverless Cross-Device Clipboard

AWS Lambda, API Gateway, Amplify, S3, JavaScript

- Built a serverless clipboard sync backend on AWS — Lambda for compute, API Gateway for routing, S3 for storage, Amplify for hosting; achieved sub-100ms API response.
- Designed a stateless auto-scaling architecture with zero server provisioning; automatic scaling to demand with no infrastructure management overhead.

Ubuntu Server — Browser-Based VDI System

Linux, QEMU/KVM, NGINX, VNC, noVNC, Websockify, Tailscale, Netplan, Bash

- Provisioned headless Kali Linux VM via QEMU/KVM; configured NGINX reverse proxy and static IP via Netplan; bridged VNC via Websockify + noVNC on port 6080.
- Extended WAN access via Tailscale overlay networking with two-layer auth (VNC + OS credentials) for secure remote connectivity.

Developer Portfolio — Full-Stack CMS

Next.js, TypeScript, Supabase (PostgreSQL), Tailwind CSS, Vercel — adityak.dev

- Deployed full-stack CMS on Vercel with Supabase managed PostgreSQL; implemented row-level security, RBAC, and auth-protected admin dashboard across 4 content modules.

Technical Skills

Cloud Platforms: AWS (Lambda, API Gateway, Amplify, S3), Oracle Cloud Infrastructure (OCI), Serverless Architecture, Vercel, Supabase

Infrastructure: Docker, Docker Compose, NGINX, QEMU/KVM, Virtualization, Linux (Ubuntu Server, Kali), Bash/Shell, SSH

Networking: Reverse Proxy, Overlay Networks (Tailscale), Netplan, Static IP Configuration, VNC/Websockify, LAN/WAN

Security: SAST, Secure SDLC, OWASP Top 10, Secure Code Review

Languages: Python, Bash, TypeScript, JavaScript, SQL, C, C++, Java

Backend & APIs: FastAPI, Flask, Node.js, RESTful APIs, PostgreSQL, Firebase **Tools:** Git, GitHub, Postman, VS Code

Achievements

- LeetCode — 250+ problems solved across arrays, trees, graphs, and dynamic programming.
- **Defy '25 Aptos Side Track Winner** — blockchain smart-contract solution at national hackathon.
- Open Source — 40+ public repositories; Pull Shark & Pair Extraordinaire GitHub achievements.
- Competitive Programming — problem setter, mentor, and judge across 5+ contests, CodeChef VIT-Chennai Chapter.
