Education

B.Tech Computer Science — Vellore Institute of Technology, Chennai

Aug 2023 – May 2027

CGPA: 8.71 / 10

Coursework: Operating Systems, Computer Networks, Distributed Systems, Cloud Computing, Cryptography, Software Engineering

Experience

Research Intern — Cybersecurity & Software Assurance

May 2026 – Jul 2026

SAG, DRDO – Ministry of Defence, Delhi

- Performed SAST, secure code review, and Secure SDLC compliance validation on defence-grade software within classified environments.
- Identified and documented security vulnerabilities and software defects; applied secure coding practices under strict confidentiality protocols.

Software Engineering Intern

Jun 2025 – Jul 2025

Kirat Communication Pvt. Ltd., Haryana

- Deployed a multi-service inference pipeline (Flask + Whisper STT + Ollama LLM + Gemini API) on resource-constrained Raspberry Pi hardware; reduced end-to-end latency by 40% through buffer optimization and request batching.
- Independently managed full deployment lifecycle — architecture, implementation, performance tuning, and validation for an early-stage startup.

Chairperson — Backend & Systems

Apr 2025 – May 2026

Nexus Club, VIT Chennai (200+ members)

- Built the club website and internal automation tooling (TypeScript, Node.js, Supabase); led Git/GitHub workshops for 200+ students.
- Coordinated NexusForum — managed technical infrastructure for 1,800+ attendees with industry speakers and programming tracks.

Projects

Ubuntu Server — Browser-Based VDI System

Linux, QEMU/KVM, NGINX, VNC, noVNC, Websockify, Tailscale, Netplan, Bash

- Provisioned headless Kali Linux VM via QEMU/KVM on Ubuntu host; bridged VNC via Websockify + noVNC on port 6080; configured NGINX reverse proxy and static IP via Netplan for stable LAN access.
- Implemented two-layer authentication (VNC + OS credentials) and WAN extension via Tailscale overlay networking for secure remote connectivity.

CloudClip — Serverless Cross-Device Clipboard

AWS Lambda, API Gateway, Amplify, S3, JavaScript

- Built a serverless clipboard sync backend on AWS (Lambda + API Gateway + S3); achieved sub-100ms API response measured via Postman; stateless auto-scaling with zero server provisioning.

Developer Portfolio — Full-Stack CMS

Next.js, TypeScript, Supabase (PostgreSQL), Vercel — adityak.dev

- Deployed full-stack CMS on Vercel with Supabase PostgreSQL backend; designed normalized schema, row-level security, and RBAC across 4 content modules.

Certificate Automation System

Python, SMTP, PDF Generation, Bash

- Automated batch certificate generation and email distribution to 500+ recipients via SMTP with error handling and delivery confirmation; cut manual distribution time by 95%.

Technical Skills

Infrastructure & Linux: Linux (Ubuntu Server, Kali), QEMU/KVM, Virtualization, NGINX, Bash/Shell, SSH, Netplan, Tailscale, Docker, Docker Compose

Cloud & Automation: AWS (Lambda, API Gateway, Amplify, S3), CI/CD (GitHub Actions), Serverless Architecture, Vercel

Networking: Reverse Proxy, Overlay Networks (Tailscale), VNC/Websockify/noVNC, Static IP Configuration, LAN/WAN

Security: SAST, Secure SDLC, Secure Code Review, OWASP Top 10

Languages: Python, Bash, TypeScript, JavaScript, C, C++, SQL, Java

Backend: FastAPI, Flask, Node.js, RESTful APIs, PostgreSQL, Supabase, Firebase **Tools:** Git, GitHub, Postman, VS Code

Certifications & Achievements

- Oracle Cloud Infrastructure Architect Associate** (2026) · **OCI Foundations Associate** (2026)
- LeetCode — 250+ problems solved across arrays, trees, graphs, and dynamic programming.
- Defy '25 Aptos Side Track Winner** — blockchain smart-contract solution at national hackathon.
- Open Source — 40+ public repositories; Pull Shark & Pair Extraordinaire GitHub achievements.
- Competitive Programming — problem setter, mentor, and judge across 5+ contests, CodeChef VIT-Chennai Chapter.
